EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joel Skinner on June 13, 2005.

The application has been amended as follows:

In the specification,

Page 4, *Lines 3-4, "5mm to 0.5mm" has been changed to - -0.5mm to 5mm- -.*

Page 13, *Line 16, "an" has been changed to - -a- -, and - -in- - has been inserted before "a".*

Page 15, *Line 15, "15" has been changed to - -14- -.*

Page 16, *Lines 6 and 9, "24" in its first occurrence has been changed to - -23- -.*

Page 19, *Line 21, "plane" has been changed to - -side- -.*

Page 20, *Line 22, "an" has been changed to - -in- -.*

Page 26, *Lines 5 and 7, "89" has been changed to - -97- -.*

Page 28, *Line 4, "14148" has been changed to - -5- -.*

Line 10, “the” has been changed to - -a- -;

Line 20, “central aperture contacts, compresses, and crimps”

has been changed to - -segment distal ends contact,

compress, and crimp- -.

2. The following is an examiner’s statement of reasons for allowance: Regarding **claim 1**, the prior art does not teach or suggest providing an arrangement of a plurality of segments, each having a predetermined shape with a proximal end and an angled distal end with at least one angled side face terminating in an edge of a predetermined length, each segment having a centerline between the proximal and distal ends, each segment having a proximal point and a distal point, one point being disposed on the centerline and one point being disposed off the centerline, and one point being pivotally coupled by pins to a stationary member and one point being pivotally coupled by pins to a rotatable member, the segments being arranged so that the segment distal ends are disposed adjacent to and a predetermined distance away from a central point and defining a central aperture with a cylindrical dimension, and that the segment centerlines extending therefrom toward the segment distal ends are oriented away from the central point, in combination with the other claimed limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
